

CERTIFICATION PROGRAMME

TECHNICAL TRAINING MOBILE TECHNOLOGIES

SPEAKER

ALIAKSANDR KHOLALAU

Networking & IoT Engineer

ABOUT THE MOBILE TECHNOLOGIES TRAINING PROGRAMME

This training offers a comprehensive overview of mobile technologies, focusing on key aspects of the cellular ecosystem. Participants will gain insights into the fundamentals of mobile hardware, learn effective techniques for troubleshooting mobile connectivity issues, and develop expertise in configuring mobile devices.

With a blend of theoretical knowledge and practical exercises, this program equips attendees with the skills to manage, optimize, and troubleshoot mobile systems effectively.

STRUCTURE

This 12-hour training program, delivered live or online over two days, is structured for groups of 6-10 participants and includes an exam. Participants must have a headset, microphone, and a

laptop with an Ethernet port. A Teltonika Router from the RUT2/RUT9 series or similar, and a SIM card, are also required. Software: TeamViewer or AnyDesk, and an SSH client.

TOPICS

Fundamentals	Connection Process	Carrier Agregation
CAT-M1/NB-IoT	5G	SMS
Calls	Mobile Troubleshooting	Mobile configuration
