TELTONIKA

CERTIFICATION PROGRAMME

TECHNICAL TRAINING
RMS FUNDAMENTALS

SPEAKER

ALIAKSANDR KHOLALAU

Networking & IoT Engineer

ABOUT THE RMS FUNDAMENTALS TRAINING PROGRAMME

This training provides an in-depth understanding of RMS (Remote Management System), a powerful platform for monitoring and managing Teltonika devices. Participants will explore key features, including support for integrating third-party devices, seamless remote access with RMS VPN, and leveraging RMS API for custom solutions.

Hands-on sessions will equip attendees with the skills to optimize device management, ensure secure connections, and streamline operations using RMS's versatile capabilities.

STRUCTURE

This training programme takes place once a quarter, lasting 10 hours over the course of two days. This discussion-format training is done via Microsoft Teams in groups of 6-10 participants

and includes an exam at the end. Participants must have a headset, microphone and a laptop. Required software: TeamViewer or AnyDesk.

TOPICS

RMS introduction	RMS Management	RMS Connect
RMS VPN	RMS API	Device configuration
Task manager	Alerts & automation	Administration
