

CERTIFICATION PROGRAMME

TECHNICAL TRAINING NETWORKS

SPEAKER

ALIAKSANDR KHOLALAU

Networking & IoT Engineer

ABOUT THE NETWORKS TECHNOLOGIES TRAINING PROGRAMME

This advanced training program explores the core concepts of modern networking, communication protocols, and wireless technologies. Participants will gain in-depth knowledge of network architectures, essential protocols like TCP/IP and BGP, and

the latest wireless standards such as Wi-Fi 6 and IoT connectivity. With hands-on training and real-world scenarios, attendees will enhance their skills in configuring, troubleshooting, and optimizing network systems for today's connected world.

STRUCTURE

This training program is live training session, lasting 12 hours over the course of two days.

Group of 6-10 participants and includes an exam at the end. Participants must have a laptop with possibility to connect Ethernet device to it.

TOPICS

OSI & TCP/IP	Protocols	Networking hardware
Network Topologies	IPv4/IPv6	Subnets
Routing	Wireless networking	API

PRICE:

\$250/€250 + VAT PER PARTICIPANT
