Networking & IoT Engineer

ABOUT THE FUNDAMENTALS TRAINING PROGRAMME

This technical training programme provides your sales and technical support teams with key fundamental expertise with Teltonika networking products.

Covering topics such as networking and troubleshooting basics, configuration examples, and use cases, this programme is integral for maximising the value of being a Teltonika partner.

STRUCTURE

This training programme takes place twice a month, lasting 15 hours over the course of three days. This discussion-format training is done via

Microsoft Teams in groups of 6-10 participants and includes an exam at the end. Participants must have a headset and microphone.

TOPICS

Networking basics	Devices portfolio overview	Operational systems
RMS	Configuration examples	Use cases
Troubleshooting basics	WebUI/CLI usage	Internal systems

PRICE:
$250/€250 PER PARTICIPANT
