

PRODUCT TRAINING LEVEL 1

SPEAKER

EVELINA SINKEVIČIŪTĖ

Head of Operational Marketing Projects

ABOUT THE NETWORKING PRODUCTS TRAINING PROGRAMME

This training offers an in-depth understanding of Teltonika networking products, their purpose, and the manufacturing process. We'll showcase real-world use cases from across the globe, emphasizing the value our products bring to each scenario.

Delivered via Microsoft Teams, this interactive five-hour training is structured as a discussion-based session. We'll dive into the added value of RMS in IoT solutions, explore the extensive functionalities and customization options of RutOS, and guide you on leveraging our resources to benefit your business.

STRUCTURE

The training will be a one-day event lasting a total of five hours, delivered via Microsoft Teams. It is structured as a discussion-based session, with

small groups of up to 12 participants. Participants are required to have a headset and microphone, while using a camera is optional.

TOPICS

Corporate information	Product information
Manufacturing capabilities	RMS introduction & Demo
RutOS overview & Demo	Useful resources / information
